Unique Solution Recovers Lost RAR Passwords

September 2011. Passcovery Co. Ltd. releases Accent RAR Password Recovery 1.0, the brand new solution for recovering lost passwords to RAR 3.x archives that runs at lightning speed on all modern Intel/AMD processors and ATI/NVIDIA graphics cards.

According to download.com, WinRAR was one of the most popular RAR format file archivers on the internet. One of the reasons for WinRAR's popularity is the tough encryption it uses to protect archives. Lose the password and you've got a serious problem. But Passcovery has a serious solution!

Passcovery Co. Ltd. just released Accent RAR Password Recovery 1.0, a unique tool for recovering lost RAR passwords.

For users, the most important feature of Accent RAR Password Recovery is its speed and flexibility – the software runs at top speed both on conventional processors and on ATI/NVIDIA graphics cards.

Accent RAR Password Recovery contains microcode optimized for all Intel and AMD processors. When the software is launched, it detects the processor type and selects the best code for that specific processor. Users get lightning-fast password recovery no matter what processor you have.

Accent RAR Password Recovery delivers even more impressive performance with the addition of GPU computing to the mix. The software uses ATI Stream and NVIDIA CUDA technologies and can run on all ATI and NVIDIA graphics cards. What does this mean for users? Since modern graphics cards evolve exponentially with large numbers of parallel processors, Accent RAR Password Recovery exploits these advantages to recover RAR passwords in record time.

> *Example: One AMD 6990 graphics card uses its 3,072 parallel processors 20 times faster than the Intel i7-2600 processor with 8 virtual cores (4 physical cores).*

Accent RAR Password Recovery supports archives with AES encoding (WinRAR 2.90 and higher).

Licenses and Pricing

Accent RAR Password Recovery have demonstrated long-term, stable operation on all versions of the Microsoft Windows operating system. The cost of a license depends on the number of graphics cards supported and starts at $40 for a Basic license.

About Passcovery

Passcovery Co. Ltd. develops high-speed, professional software solutions for recovering lost passwords. The first versions of these solutions were released in 1999. Today, the company's software is successfully used by law enforcement, government agencies, corporations and private individuals around the world.
